

## COMPANY PROFILE

### AIPTEK INTERNATIONAL GMBH

#### Who we are

Founded in October 2015, Global Aiptek Corp (GAC) is a spin-off company created from the de-merger of the highly successful 'Pico Projection' business unit of Aiptek International Inc – a worldwide pioneer for many highquality technical products. GAC subsequently acquired Aiptek's largest international subsidiary - Aiptek International GmbH located in Willich, Germany – to collectively strengthen the support and service functions in order to operate effectively in the EMEA market.

#### Vision

Global Aiptek Corp strives to be at the forefront of mobile and interactive projection technology.

#### Mission

We are in the era where the demands of an active and on-the-go lifestyle require our devices to move with us without compromises. This signals the essential need for mobility and portability in our devices and to complement our unique lifestyles. At GAC, we craft innovative mobile solutions with a purpose: create visual and aural experiences that can empower, inspire, entertain and enrich the lives of our customers. Due to our philosophy we deliver a superior user experience, high quality and performance as well as portability in all our products.
